

459.311 Minimum requirements for manure control.

1. A confinement feeding operation shall retain all manure produced by the operation between periods of manure disposal. For purposes of [this section](#), dry manure may be retained by stockpiling as provided in [this subchapter](#). A confinement feeding operation shall not discharge manure directly into water of the state or into a tile line that discharges directly into water of the state.

2. Manure from an animal feeding operation shall be disposed of in a manner which will not cause surface water or groundwater pollution. Disposal in accordance with the provisions of state law, including [this chapter](#), rules adopted pursuant to the provisions of state law, including [this chapter](#), guidelines adopted pursuant to [this chapter](#), and [section 459.314](#), shall be deemed as compliance with this requirement.

3. The department may require that the owner of a confinement feeding operation install and operate a water pollution monitoring system as part of an unformed manure storage structure.

4. The owner of the confinement feeding operation which discontinues the use of the operation shall remove all manure from related confinement feeding operation structures used to store manure, by a date specified in an order issued to the operation by the department, or six months following the date that the confinement feeding operation is discontinued, whichever is earlier.
